Marelli is an Italian third-generation family run business. For the past 15 years, it has brought a wealth of expertise and know-how to the production of furniture for live and work spaces. Marelli has developed furniture systems in partnership with Jérôme Gauthier Studio.

They have been working together since 2008. They continuously explore new ideas, design and develop suitable, consistent and complementary furniture solutions for optimized management of work environments.

The solutions offered take into account the changes in the business environment, work methods and tools. They allow having isolated sound absorbing areas conducive to reflection next to collective meeting areas fostering creativity.

Marelli programs enhance supportive work environments and promote the use of integrated and efficient productive modes.

2008 Stripes

The bench, a collective seating furniture by nature, lies at the core of the Stripes sofa concept. From slats to upholstered covers, this piece of furniture embodies with style the archetype. It also offers a unique touch thanks to the back cushion.

Modules can be linear, curvilinear, closed, with adjustable back height, with or without armrest. They can offer various combinations: face to face, side by side depending on orthogonal and hexagonal stripes. The sofa becomes a work station when adding a shelf on the backrest at the rear. Therefore, the combined augmented modules provide ideal configurations for multimedia collaborative space

When used independently or combined in a flexible manner, Stripes components allow for multipurpose work environments suitable for all staff to perform their tasks.

L-Sofa

L-Sofa & H-Sofa offer a complete seating sofa solution.

Longitudinal wooden panels hold, on the one hand, the base structure and, on the other hand, the L molded plywood for the seating, high back and armrest cushions. These elements are common features of the L-Sofa and H-Sofa range.

The leg length which is proportionate to the height of the plywood L are key features of these two lines of sofas that can be extensible and adjustable over and over.

The L frames are available in different wood material, lacquered wood and various colors in order to go with the cushions available in a wide range of fabrics, leathers and colors.

2014 Pivot

The Pivot chair and table are characterized by their flexibility. The Pivot chair is the first seat by Marelli with a swivel function. Made entirely from beech wood, the molded plywood components convey a sense of comfort and tranquility in the seating position.

The upholstered chair's seat and back, available in a large range of fabrics and colors, are supported by a wooden structure through a rotating mechanism fitted to the legs.

This circular movement enables easy rotating and circulation from one space to another. The Pivot table is adjustable in height. The table base, similar to that of the chair, is held by a wooden screw fixed in the table top.

The tabletops, available in two dimensions, can be adjusted up and down. They are suitable for all horizontal uses, from a coffee table, side table to a meeting table. An object that is fully functional thanks to its flexible use.

Losange ✱

Losange is a modular seating system. Part of an uneven subdivision of the hexagon, each element of this « tangram » is both autonomous and complementary.

The multiple possible compositions offer a wide variety of space configurations with mixed uses.

The graphic vibration of the hatched frames of each removable padded cover adds upto the geometric forms' dynamics. The triangle and diamond shape, available in two heights, increase the number of seating positions, leaning position and upright position.

An intuitive, multiform and extensible furniture solution.

2018

Pendrillon

Pendrillon is a cell-based organization system. Each cell defines itself as a spatial unit that is partly closed and fully autonomous.

Each of these micro-architectures provides an organizational infrastructure designed to meet employees' needs in a multipurpose work environment, thus offering semi-closed individual offices as well as open collective meeting areas.

A flexible and sustainable furniture solution for changing and nomadic work environments.
