PIVOT

With WORKSHAKER, based on the Stripes and L-Sofa models, Jérôme Gauthier proposes professional environments suited to workers' highly-evolved tools and methods. Characterized by phonic and visual insulation conducive to reflection, collective meeting zones and individual work zones cohabit in the same optimized space. The alternating horizontal supports (seat, table and tray) and the vertical surfaces (file partitioning) encourage a variety of postures in a multitude of situations.

This diversity of spatial positions – face to face, side by side, back to back – and the quality of exchanges it allows, is enriched by the rotating seat and the height adjustable table Pivot, linked to the Stripes Back Tray and L-Sofa Light. Integrated solutions for electrical and computer connections facilitate the use of tables and trays. Independent electrical and lighting additions augment connection possibilities and users'mobility. Marelli introduces a mix of versatile and easily expandable organizational solutions to furnish easy to access and use work spaces.

Stripes

Design Jérôme Gauthier 2009

La collezione STRIPES, creata dal designer Jérôme Gauthier, è ispirata alle tipiche panchine a doghe in legno orizzontali utilizzate nei parchi pubblici parigini ed è caratterizzata dalla trapuntatura a righe (da cui viene il nome "Stripes").

Stripes è un modello testato fonoassorbente ed è conforme ai test BIFMA statunitensi.

Per favorire l'ergonomia e la comodità del prodotto, lo schienale è dotato di un poggiatesta con un angolo di inclinazione di ca. 22° in modo tale che non sono necessari cuscini per garantire il comfort.

Seduta, schienale e braccioli sono composti da un fusto in pannelli di multistrato da 20 e 40 mm di prima scelta. La resistenza del fusto è garantita da una costruzione ad incastri che offre elevate garanzie di tenuta.

La seduta, priva di cinghie elastiche intrecciate, è in poliuretano espanso CM 40/P/kg/m³ 5,9 kPa e rinforzi con SR75 Kg/m³ 15,5 kPa.

Schiene e poggiatesti sono in poliuretano espanso CM 40 kg/m³ 5,9 kPa.

Il fusto e i braccioli sono rivestiti in poliuretano espanso, con una densità di 40 kg/m³ 5,9 kPa e 75 kg/m³ 15,5 kPa. Per garantire la durabilità del prodotto nel tempo nei punti maggiormente soggetti a deformazione vengono utilizzati degli aggregati di poliuretano espanso della densità complessiva di 200 kg/m³, sotto cui è montata una piastra di metallo da 40 x 5 mm.

La parte esterna del fusto è inoltre rivestita in fibra termolegata di 250 gr.

I braccioli sono fissati tramite bulloni e baionette.

Il poliuretano espanso è sempre ignifugo CMHR (Combustion Modified High Resilient) e risponde alle norme British Standard (BS), Cal 117, Classe 1IM, nonché, su richiesta, ad altri standard (per esempio le norme tedesche DIN o le norme francesi NF).

Le caratteristiche righe ("stripes" in inglese), orizzontali o verticali, sono ottenute tramite una trapuntatura che accoppia non solo il rivestimento (tessuto, finta pelle o pelle) e il dacron, ma anche uno strato di gomma con uno spessore di 1 cm. Ogni riga è alta 8 cm.

Il rivestimento del modello Stripes è sempre fisso, sia in tessuto che in pelle o finta pelle.

The STRIPES collection, created by the designer Jérôme Gauthier, was inspired by the typical wooden horizontal slat benches used in public parks in Paris and is characterized by the stripes quilting, that is where the name "Stripes" comes from.

Stripes is a tested sound absorbing model and complies with the U.S. BIFMA standards.

In order to enhance the ergonomics and the comfort of the product, the backrest is equipped with a low back support with an inclination angle of about 22 degrees, so that no further cushions are needed to ensure the sofa comfort.

Seat, backrest and arms have a frame made of 20 and 40 mm multi-ply wooden panels of the highest quality. The frame resistance is guaranteed by a joint construction.

The seat, which is not equipped with interwoven elastic belts, is made of polyurethane foam CM 40/P/kg/m³ 5,9 kPa, with supports in foam SR75 Kg/m³ 15,5 kPa.

Backrest and low back support are made of polyurethane foam CM 40 kg/m³ 5,9 kPa.

Rückenlehne und Nierenschütze sind mit Polyurethan-Schaumstoff CM 40 kg/m³ 5,9 kPa gepolstert.

Gestell und Seitenteile sind mit Polyurethan-Schaumstoff mit einer Dicke von 40 kg/m³ 5,9 kPa und 75 kg/m³ 15,5 kPa gepolstert.

Die Verwendung von Polyurethan-Schaumstoff-Aggregaten mit einer Gesamtdichte von 200 Kg/m³ in den Punkten, die der Verformung mehr ausgesetzt sind, sichert die Dauerhaftigkeit des Produktes für lange Zeit.

Darunter wird zusätzlich eine Metallplatte 40 x 5 mm befestigt.

Die Aussenseiten des Gestells sind zusätzlich mit einer Ummantelung aus thermogebundenen Fasern mit Gewicht 250 Gr. ausgestattet.

Die Seitenteile sind mittels Schrauben und Baionettverschlüssen befestigt.

Der Polyurethan-Schaumstoff ist immer schwerentflammbar CMHR (Combustion Modified High Resilient), gemäß British Standard (BS), Cal 117, Klasse 1IM, oder, auf Anfrage, gemäß anderen Standards, wie beispielsweise den deutschen DIN-Normen oder den französischen NF-Normen.

Die typischen Streifen - Stripes -, die horizontal oder vertikal ausgeführt werden können, erhält man nicht nur durch die Verbindung des Bezugsmaterials - Stoff, Leder oder Kunstleder - mit Dacron, sondern es wird hier auch Schaumstoff mit einer Dicke von 1 cm eingearbeitet. Jeder Streifen ist 8 cm hoch.

Die Modelle der Serie Stripes sind immer festbezogen.

Die Kollektion STRIPES, gezeichnet vom Designer Jérôme Gauthier, lehnt sich an die typischen Fassadenbänken in den Pariser Parks und ist durch die Streifenabstempfung - daher der Name « Stripes », gekennzeichnet.

Stripes ist ein schallsorbierendes, getestetes Modell und besteht die US-BIFMA Tests.

Die Ergonomie und der Sitzkomfort des Produkts werden durch die in die Rückenlehne eingearbeitete Nierenschütze gefördert. Diese hat eine Neigung von ca. 22°, so dass zusätzliche Kissen nicht benötigt werden, um die Bequemlichkeit und den Sitzkomfort dieses Produkts zu gewährleisten.

Sitz, Rückenlehne und Seitenteile bestehen aus einem Gestell aus Schichtholzplatten mit einer Dicke von 20 und 40 mm von höchster Qualität. Die Haltbarkeit des Gestells wird durch eine Steckkonstruktion gewährleistet.

Die Sitzfläche, ohne geflochtene Gummigurtung, besteht aus Polyurethan-Schaumstoff CM 40/P/kg/m³ 5,9 kPa und renforts avec SR75 kg/m³ 15,5 kPa.

Backrest und low back support are made of polyurethane foam CM 40 kg/m³ 5,9 kPa.

Die Modelle der Serie Stripes sind immer festbezogen.

La collection STRIPES, créée par le designer Jérôme Gauthier, est inspirée par les banquettes à lattes de bois horizontales utilisées dans les parcs publics parisiens et est caractérisée par le matelassage à rayures (d'où le nom "Stripes").

Stripes est un modèle testé insonore et est conforme aux tests étasuniens BIFMA.

Pour faciliter l'ergonomie et le confort du produit, le dossier est équipé d'un support lombaire avec un angle d'inclinaison d'environ 22° de telle sorte que des coussins lombaires ne sont pas nécessaires pour assurer le confort. L'assise, le dossier et les accoudoirs sont composés d'une carcasse en panneaux de multiplis de 20 et 40 mm de premier choix.

La résistance de la carcasse est assurée par une construction avec des joints qui offre des garanties élevées de durée de vie.

L'assise, qui n'a pas de sangles élastiques entrecroisées, est en mousse de polyuréthane CM 40/P/kg/m³ 5,9 kPa et renforts avec SR75 kg/m³ 15,5 kPa.

Le dossier et les accoudoirs sont en mousse de polyuréthane CM 40 kg/m³ 5,9 kPa.

La carcasse et les accoudoirs sont revêtus de mousse de polyuréthane avec une densité de 40 kg/m³ 5,9 kPa et 75 kg/m³ 15,5 kPa.

Afin d'assurer la durabilité du produit dans le temps au niveau des points les plus sujets à la déformation, des agrégats de mousse de polyuréthane d'une densité globale de 200 kg/m³ sont utilisés, sous lesquels est montée une plaque métallique de 40 x 5 mm.

En plus, l'extérieur de la carcasse est revêtu de dacron de 250 grammes.

Les accoudoirs sont fixés à l'aide de boulons et baionnettes.

La mousse de polyuréthane est toujours ignifuge CMHR (Combustion Modified High Resilient) et répond aux normes British Standard (BS), CAL 117, Classe 1IM, ainsi que, sur demande, à d'autres normes (par exemple les normes allemandes DIN ou les normes françaises NF).

Les rayures ("stripes" en anglais) caractéristiques, horizontales ou verticales, sont obtenues grâce à un matelassage qui couple non seulement le revêtement (tissu, similicuir ou cuir) et le dacron, mais aussi une couche de mousse de polyuréthane avec une épaisseur d'1 cm. Chaque rayure est haute 8 cm.

Le revêtement du modèle Stripes est toujours fixe, aussi bien en tissu qu'en similicuir qu'en cuir.

De la couverture du modèle Stripes est toujours fixe, aussi bien en tissu qu'en similicuir qu'en cuir.

De collectie STRIPES, gecreëerd door ontwerper Jérôme Gauthier, is geïnspireerd op de typische bankjes met horizontale houten latten die men in de Parijse openbare parken vindt en wordt gekenmerkt door de doorstikking in streepvorm (vandaar de naam "Stripes").

Stripes is een model dat getest is op zijn geluidsabsorberendheid en is conform aan de BIFMA-tests uit de Verenigde Staten.

Om de ergonomie en het comfort van het product te bevorderen, is de rugleuning voorzien van een lendensteun met een hellingshoek van ca. 22°, zodat geen lendenkussentjes nodig zijn om het comfort te waarborgen.

Zit, rug en armleuningen bestaan uit een romp van eerste keus multiplexpanelen van 20 en 40 mm.

De stevigheid van de romp wordt gewaarborgd door een pen- en gatconstructie die garant staat voor een lange levensduur.

De zit, zonder door elkaar gekruiste elastische banden, is uitgevoerd in polyurethaanschuim van het type CM 40/P/kg/m³ 5,9 kPa en verstevigingen in polyurethaanschuim van het type SR75 kg/m³ 15,5 kPa.

Le dossier en les accoudoirs sont en mousse de polyuréthane CM 40 kg/m³ 5,9 kPa.

La carcasse en les accoudoirs sont revêtus de mousse de polyuréthane avec une densité de 40 kg/m³ 5,9 kPa et 75 kg/m³ 15,5 kPa.

Afin de garantir la durabilité du produit sur le long terme au niveau des points les plus susceptibles de déformation, des agrégats de mousse de polyuréthane d'une densité totale de 200 kg/m³ sont utilisés, sous lesquels est montée une plaque métallique de 40 x 5 mm.

En plus, l'extérieur de la carcasse est revêtu de dacron de 250 grammes.

De buitenkant van de romp wordt daarenboven bekleed met dacron van 250 gram.

De armleuningen worden bevestigd met behulp van bouten en baionetten.

Het polyurethaanschuim is altijd brandvertragend van het type CMHR (Combustion Modified High Resilient) en beantwoordt aan de normen British Standard (BS), CAL 117, Classe 1IM, alsook, op aanvraag, aan andere normen (bijvoorbeeld aan de Duitse DIN-normen of aan de Franse NF-normen).

De typische strepen ("stripes" in het Engels), horizontaal of verticaal, worden verkregen door een doorstikking die niet alleen de bekleding (stof, kunstleer of leer) en de dacron, maar ook een laag polyurethaanschuim met een dikte van 1 cm aan elkaar koppelt. Elke baan is 8 cm hoog.

De bekleding van model Stripes is altijd vast, zowel in stof als in kunstleer als in leer.

Отличительной особенностью коллекции STRIPES от французского дизайнера Жерома Готье (Jérôme Gauthier) является наличие характерной стежки в полоску (отсюда и название STRIPES), а прообразом послужили скамейки на основе горизонтальных деревянных реек - неизменные спутники парижских общественных парков. Артикулы коллекции Stripes прошли испытание на необходимый уровень звукопоглощения и соответствуют американскому стандарту BIFMA (единая база стандартизации по безопасности, долговечности и рабочих функций изделия). Для большей эргономичности удобства нижняя часть спинки, соприкасающаяся с поясницей, имеет угол наклона в 22°, что позволяет обеспечить комфорт, не используя дополнительные подушки.

Каркас сиденья выполнен из панелей «мультистрат» - многослойной фанеры высокого качества толщиной от 20 до 40 мм. Прочность каркаса обусловлена жесткой конструкцией, обеспечивающей повышенные гарантийно-эксплуатационные качества.

Наполнение сиденья из вспененного полиуретана CM 40/P/kg/m³ 5,9 kPa со вставками из вспененного полиуретана SR плотностью 75 kg/m³ 15,5 kPa, без эластичных перекрещивающихся ремней. Наполнение спинки и нижней части спинки, соприкасающейся с поясницей из вспененного полиуретана CM 40/kg/m³ 5,9 kPa. Каркас и подлокотники с покрытием из вспененного полиуретана плотностью 40 kg/m³ 5,9 kPa и 75 kg/m³ 15,5 kPa.

Для обеспечения максимально длительного срока эксплуатации на участках, где чаще всего могут возникать деформации используется наполнение из вспененного полиуретана общей плотностью 200 kg/m³ в сочетании с поддерживающей металлической пластины 40 x 5 mm. Внешняя часть каркаса отделана слоем из термоскрепленного волокна 250/m³. Крепление подлокотников на болтах и при помощи байонетного соединения.

Высокоупругий трудновоспламеняемый вспененный полиуретан категории CMHR (Combustion Modified High Resilient), соответствует всем необходимым нормам и стандартам (английский British Standard (BS), американский Технический бюллетень 117 (Cal117), класс эмиссии M1, немецкий институт по стандартизации (DIN), французский орган по сертификации (NF)).

Характерные для данной коллекции вертикальные либо горизонтальные полосы ("stripes" по-английски) получаются в результате просточки, которая соединяет не только обивку (ткань, кожа, искусственная или натуральная) и дакрон, но также захватывает и слой полиуретана толщиной 1 см, таким образом, каждая полоса имеет высоту 8 см.

Все артикулы коллекции STRIPES имеют несъемную обивку, как в ткани, так и в коже, искусственной либо натуральной.
