LOOOK

Neuron Activation Pod

A HEALTH TECH PRODUCT BY LOOOK INDUSTRIES LTD.

The award-winning **Neuron Activation Pod** by **Loook Industries** uses **Neurosonic™** technology to enhance physical and mental well-being. The pods' ability to effectively remove stress, improve sleep quality, and aid in faster recovery helps you reset, improve your performance, and feel great.

Neuron Activation Pod

A HEALTH TECH PRODUCT BY LOOOK INDUSTRIES LTD.

This is not a sleep pod

You’re not supposed to sleep in this pod. The Neuron Activation Pod has a relaxing effect on the autonomic nervous system and mind. The production of stress hormones is reduced and sleep mechanisms are restored. The user calms down and falls asleep more easily, while sleep quality improves and becomes more restorative. This means better sleep at home.

»

The award-winning **Neuron Activation Pod** by **Loook Industries** uses **Neurosonic™** technology to enhance physical and mental well-being. The pods' ability to effectively remove stress, improve sleep quality, and aid in faster recovery helps you reset, improve your performance, and feel great.

THIS IS

Health tech based on vibration

This is not a massage chair

The technology’s impact is based on low-frequency vibration that activate your autonomic nervous system. The vibration promotes the body’s natural restorative properties by improving the quality of sleep and calming the nervous system. This pod is completely different from traditional massage products.

Intro & overview

«

The magic of the technology is its simplicity. The vibration frequencies are designed to awaken our body's natural way to release stress. The vibration imitates the way a zebra shakes stress out of its body in the savannah after escaping a lion. We humans have lost this ability to shake stress out of our bodies. That is why we need technology to restore this nature shaped intelligence to our bodies and help us get rid of stress.

The technology's impact is based on low-frequency vibration that activate your autonomic nervous system. The vibration promotes the body's natural restorative properties by improving the quality of sleep and calming the nervous system. With Neuron Activation Pod, restorative experiences become a part of everyday life without effort, and don't require major changes to your daily routines.

The award-winning Neuron Activation Pod by Loook Industries uses Neurosonic™ technology to enhance physical and mental well-being. The pods' ability to effectively remove stress, improve sleep quality, and aid in faster recovery helps you reset, improve your performance, and feel great.

The technology's impact is based on low-frequency vibration that activate your autonomic nervous system. The vibration promotes the body's natural restorative properties by improving the quality of sleep and calming the nervous system. With Neuron Activation Pod, restorative experiences become a part of everyday life without effort, and don't require major changes to your daily routines.

Vibration within precise frequency range is directed to the entire body simultaneously or selectively to desired parts of the body. The body responds quickly to these frequency ranges, and they are suitable for the majority of people.

The effects manifest as a calming sensation and a feeling of physical lightness. The devices can alleviate muscle tension, numbness, various aches, and promote faster muscle recovery. The technology is most effective when used daily, but regular use of the device 2-3 times a week is often sufficient.

The pod has four program areas: recovery, relaxation, power nap and activation. All programs promote sleep quality and contribute to both physical and mental recovery. Depending on the program, the pod either calms or energizes the body.

Remember that your workforce is essential to your company's success. Make sure your employees know that their well-being is a priority.

Optimal growth, productivity, and efficiency rely on your team working at their best. Utilize the Neuron Activation Pod to maintain and enhance performance in your office. The Neuron Activation Pod can aid in reducing stress, boosting productivity, and expediting recovery right at your place of business.

Use the Neuron Activation Pod's integrated touchscreen to easily select programs for relaxation, activation or recovery.

Take a powernap in the middle of a busy day or choose a relaxation program for sleep problems or stress.

You can use activation programs to increase your alertness, or warm up your muscles. Recovery programs are ideal after sports or for reducing swelling, for example.

All programs promote sleep quality and contribute to both physical and mental recovery. The effects are individual, and regular use yields the best results.

How to use the pod

A STEP-BY-STEP GUIDE

»

Don’t worry if you feel you can’t relax. The technology affects the autonomic nervous system and mechanically guides the user into a meditative state. The technology is working even in hectic surroundings where you can’t fully relax.

1 To use the pod, simply lie down with your legs uncrossed. Adjust the neck cushion for comfort. We recommend using the noise cancelling headphones if you want to listen to relaxing music or soundscapes.

2 On the start screen you can see four different program types: recovery, relaxation, power nap and activation. Select the program type and then the program you want to use. If it’s your first time using the pod, we recommend starting with a relaxation program. Before the program begins, you can change the music or simply turn off the sound. There’s also an optional alarm clock; you decide whether to set it or turn it off. After that, you’re ready to go.

3 The program will count down from 3. And once it’s started, you can easily adjust the intensity of vibration or change the soundtrack and volume to fit your comfort level.

4 As you relax in the pod, we recommend keeping the original power settings. But if you choose to make a change, you can adjust the vibration intensity by clicking on the flashing circles. To increase the intensity, slide the control to the right. To reduce it, slide the control to the left. It only takes a moment for the vibration to respond to the new setting.

5 You can press “stop” whenever you want; although, for maximum results, it’s best to wait until your time is complete. When your program is finished, the vibration will stop, and you’ll hear the alarm music, unless you’ve deactivated the alarm clock function. Press “done,” and the screen will ask you to rate your experience. Press “OK,” and the pod will return to the start screen.

6 When you’re done, give yourself a high-five! You’ve taken a timeout to put your personal wellness first! We urge you to drink water and hydrate a little extra. You may not feel any different immediately. The effects are individual. Regular use a few times a week yields the best results.

Relax
Activate
Recover

The pod has four program areas: **recovery**, **relaxation, powernap** and **recovery**. All programs promote sleep quality and contribute to both physical and mental recovery.

If you want to relieve stress and improve sleep quality, follow these steps:

» Start using the 25-minute relaxation program once a day or at least 2-3 times a week. We recommend regular use for 2-3 weeks to optimize the effects. The autonomic nervous system needs enough repetitions to form.

» Start by using the default vibration intensity. The more the sympathetic nervous system is in overdrive, the lower the vibration intensity at the beginning. Excessive intensities in such a situation can increase the level of alertness.

» A 39-minute relaxing program is often the next step in improving sleep quality. The program also has a stronger effect on your metabolism.

The program options

RELAXATION

10 MINUTES

A refreshing relaxation program that covers the entire body, providing a rejuvenating effect similar to a quick power nap. This program also relieves muscle tension. A convenient option for those with busy schedules.

20 MINUTES

This is the most physical of the relaxation programs with a special focus on the back, to target and alleviate neck and shoulder tension effectively. The program relieves stress and promotes sleep quality.

25 MINUTES

Ideal for beginners, this program is highly effective in enhancing sleep quality and reducing stress. This is the program we recommend when you start using the device.

39 MINUTES

A deep relaxation program that includes both a calming and relaxing stage, as well as a massage stage. The program is similar to the 25-minute program but with increased metabolic activation. Enhances sleep quality and reduces stress. Very relaxing.

ACTIVATION

12 MINUTES

A short program designed to effectively increase alertness. The program boosts your metabolism and makes you feel energized and refreshed. It is ideal for both morning or daytime use.

24 MINUTES

This is a powerful activation program designed to activate the entire body. The program effectively increases alertness and makes you feel energized and refreshed. Good for alleviating neck and shoulder tension. Suitable for actively exercising people for muscle warm up. We don't recommend using this program if you have trouble sleeping.

RECOVERY

36 MINUTES

This program helps the body recover faster from training sessions. The program is designed to promote both physical and mental recovery. Effectively increases blood circulation while relaxing muscles. This program also promotes sleep quality.

41 MINUTES

This is a sleep quality-focused recovery program with relaxing phases, making it suitable for use after sports later in the evening.

POWERNAP

10 MINUTES

This is the same program as the 10 minute relaxation program. A refreshing relaxation program that covers the entire body. It has a rejuvenating effect similar to a quick power nap.

Feel free to use all programs and higher intensity levels if you don't have challenges with sleep quality and stress or other special considerations.

We don't recommend using activation or recovery programs when you first start using the pod, or if you suffer from sleep disorders, physical stress, migraines, epilepsy or are otherwise sensitive to vibration. **Please read the safety instructions before using the device.**

«

Recovery from sports. The 41 minute recovery program helps the body recover faster from heavy training by boosting blood circulation and lymphatic circulation in tissues. Increased blood circulation reduces muscle stiffness and pain. Vibration also has a positive effect on resting heart rate and heart rate variability. Effective recovery is a key in reaching your goals, helping to make your body ready for even the hardest of workout challenges.

»

When you start using the pod, we recommend using the default vibration intensity and to only increase the intensity when you are more familiar with the device. Too high power settings can cause opposite reactions to what you aim for.

INSTRUCTIONS & ADVANCED

Settings

Sleep quality

Tip! It is recommended to take the treatment in the evening, but if the treatment is taken during the day, heavy exercise is not recommended afterwards.

Stress relief

Tip! If you take a stress relieving treatment during your workday, we advice to use headphones (with or without music) and to close your eyes to enhance the effect. If you fall asleep, don't sleep more than 15 minutes.

Recovery

Tip! Do not use at the beginning of relaxation treatments, or if you suffer from sleep disorders, physical stress, migraines, epilepsy or are otherwise sensitive to vibration. Very activating!

Increase alertness level

Tip! Do not use at the beginning of relaxation treatments, or if you suffer from sleep disorders, physical stress, migraines, epilepsy or are otherwise sensitive to vibration. Very activating!

		Programs	Zone 1 / Zone 2 / Zone 3 / Zone 4
Sleep quality		Relaxation 25 minutes	0-20/20-30/30-40/30-40
		Relaxation 39 minutes	0-20/20-30/30-40/30-40
		Recovery 41 minutes	0-20/20-30/30-50/30-50
Stress relief	Evening time	Relaxation 20 minutes	0-20/20-30/30-40/30-40
		Relaxation 25 minutes	0-20/20-30/30-40/30-40
		Relaxation 39 minutes	0-20/20-30/30-40/30-40
		Recovery 41 minutes	0-20/20-30/30-50/30-40
	Daytime	Relaxation 10 minutes	10-30/30-40/30-40/30-40
Physical recovery	After sports	Recovery 36 minutes	0-15/10-30/40-60/40-60
		Recovery 41 minutes	0-15/10-30/40-60/40-60
	Between training sessions	Relaxation 10 minutes	Activation 12 minutes
Increase alertness		Activation 12 minutes	0-20/20-30/40-60/40-60
		Activation 24 minutes	0-20/20-30/40-60/40-60

In the morning and during the day, you can try the 12 min activation program to increase alertness.

NEURON ACTIVATION POD & Stress

The Neuron Activation Pod increases parasympathetic activity, which promotes overall recovery. The effect of vibration is easily measurable and can be seen, for example, in decreased heart rate, increased heart rate variability, muscle relaxation and disappearance of headaches.

WHAT EFFECTS DOES STRESS HAVE ON OUR BODY?

In a negative and prolonged state of stress, the human body does not function normally. Stress is always a threat, causing a “fight or flight response” in the body. Physiologically, this means overactivation of the HPA axis between the brain and the adrenal cortex. The body constantly produces too much cortisol, which is a neurotransmitter related to survival. Adrenaline levels are also too high.

Physical stress can cause vague and unexplained psychophysical pain, abdominal symptoms, insomnia, and anxiety. Prolonged stress can lead to depression due to changes in neurotransmitters, mental pressure, and worse sleep quality. Usually we experience stress as a mental phenomenon, and we may not think that stress is for the most part a physiological imbalance that affects our bodies. The most important function of the body is to sustain life, and everything that threatens it causes stress reactions in us in an individual way.

VIBRATION HAS SEVERAL EFFECTS IN RELIEVING STRESS

The effect of vibration is easily measurable and can be seen, for example, in decreased heart rate, increased heart rate variability, muscle relaxation, disappearance of headaches, and normalisation of intestinal function.

The treatment leaves you with a “clear mind”, and effectively relaxes you, while the state of alertness improves. Anxiety, restlessness, and tension are relieved, which enhances mental performance. There is now room for different experiences and creativity. The Neuron Activation Pod has been found useful in workplaces, for example. The stress factors may not change, but the treatment will provide you with tools for handling them, and they will no longer wear you out in the same way.

STRESS-RELATED ACHES ARE RELIEVED

Pain may be the result of muscle tension produced by prolonged stress and sleep deprivation, as well as changes in central nervous system activity, tissue circulation, and fluid circulation. It is characteristic of stress-induced pain that no explanatory physiological defect may be found despite examinations.

According to plenty of customer feedback, the technology seems to have a quick effect in a variety of pain conditions. Vibration relaxes muscles, which improves blood circulation and oxygenation, and simultaneously muscle aches and unexplained pains are relieved.

PHYSICAL STRESS SHOULD BE ADDRESSED THROUGH PHYSICAL MEASURES

In order to get rid of physical stress, the imbalance in the body must be affected physiologically. The effect through thinking is a much slower process due to the structures of our brain, primarily the connections between the limbic system and the cerebral cortex with the frontal lobes of the brain. When the body is calmed by external stimulation, a change in thinking about stress factors is much easier.

«

Usually we experience stress as a mental phenomenon, and we may not think that stress is for the most part a physiological imbalance that affects our bodies. The Neuron Activation Pod effectively relaxes you, while the state of alertness improves. Anxiety, restlessness, and tension are relieved, which enhances mental performance. There is now room for different experiences and creativity.

The Neuron Activation Pod has a relaxing effect on the autonomic nervous system and mind. The production of stress hormones is reduced and sleep mechanisms are restored. The individual calms down and falls asleep more easily. Nocturnal awakenings are reduced, and sleep quality improves and becomes more restorative.

STAGES OF DEEP SLEEP AND REM SLEEP INCREASE

According to feedback, the technology increases the duration of the stages of deep sleep, as well as REM sleep, in most cases. Many individuals start to have dreams more often. Approximately 80% of the users benefit from even 1 to 2 treatments for sleep disorders. According to customer feedback, it appears that the vibration also affects the circadian rhythm in the body, so that the restorative stages of sleep occur at the beginning of the night, when they naturally should.

STRESS INTERFERES WITH THE ACTION OF NEUROTRANSMITTERS

Prolonged stress produces too much cortisol, adrenaline, and other neurotransmitters that activate the body. In particular, excessive cortisol production interferes with the function of GABA (gamma Aminobutyric acid), which is the major inhibitory neurotransmitter in the brain and central nervous system. In this case, falling asleep becomes more difficult or impossible.

«

Prolonged stress produces too much cortisol, adrenaline, and other neurotransmitters that activate the body. In this case, falling asleep becomes more difficult or impossible.

NEURON ACTIVATION POD &

sleep

What if you can’t relax?

Don’t worry if you feel you can’t relax. The technology directly affects the autonomic nervous system, so the mind does not have to make an effort to relax. The pod mechanically guides the user into a meditative state. The technology is working even in hectic surroundings where you can’t fully relax.

»

Feeling tired in the morning? The 12-minute activation program increases energy levels and alertness. Use the program in the morning or during the day. The activation program is particularly beneficial for office workers sitting down for extended periods of time.

THE BENEFITS OF

Health tech

The value of short breaks in the middle of the working day is quickly gaining more understanding and appreciation. Companies seeking for the ultimate competitive edge are realizing that health tech can improve both well-being and efficiency in the office.

OFFICES

It's well-known that insufficient recovery, experiencing stress, and suffering from sleep problems can lower work performance and increase the chances of accidents at work. This highlights the importance of investing in employee well-being, which has been proven to bring positive results. The Neuron Activation Pod is a great tool for reducing stress and improving sleep quality, leading to cost savings by reducing sick days and improving work efficiency.

Remember, your employees are crucial for your company's success. Let them know that their well-being is a priority. To achieve optimal growth and productivity, it's essential for your team to work at their best. A valued brand and company image is a must in finding the right experts and keeping them motivated. Investment in the well-being of employees is an important sign of a nimble and forward-thinking company.

PUBLIC SPACES

The Neuron Activation Pod presents a valuable opportunity for enhancing brand reputation and make a public space stand out. By enticing customers to extend their stay and potentially increase spending on services, it can boost overall revenue and customer engagement. Additionally, introducing the Neuron Activation Pod as a paid service, can further optimize the business's revenue streams while enhancing the overall customer experience.

The Neuron Activation Pod can provide a refreshing break during business trips or a relaxing start to a long-anticipated vacation. The pod provides efficient and convenient recovery from exhausting long-distance flights and jet lag. By using the pod you can start recovering already while travelling.

Schools and educational institutions can use the product to improve student concentration, learning outcome and well-being.

GYMS

Gyms and wellness centers are navigating a competitive landscape, always looking for opportunities to enhance customer satisfaction. The Neuron Activation Pod intelligently prepares muscles for optimal performance and helps the body recover faster from heavy training. The pod is favored by both active individuals and professional athletes. Many gyms and sports facilities are exploring supplementary revenue sources that necessitate minimal human resources while still providing added value to their customers.

HEALTH CARE

The Neuron Activation Pod is a popular choice among healthcare professionals in various healthcare settings for addressing a range of issues including sleep disorders, stress, anxiety, and mood symptoms. It's also effective in promoting relaxation, body awareness, and metabolism. The Neurosonic technology is based on scientific research, safe to use and suitable for all ages.

Use the 25 min relaxation program if you are stressed or have trouble sleeping.

The program is specifical-ly designed to relieve the symptoms of stress and sleep disorders.

»

The pod is easy to use and does not require any assembly. Just power it on and start relaxing.

Please keep in mind that this product is delivered fully assembled. Due to its size, it may not be suitable for locations with narrow door openings, staircases or small elevators. However, it can be disassembled into three smaller modules if needed.

Easy plug n' play

We recommend using the noise-cancelling headphones if you want to listen to relaxing music or soundscapes. Headphones are not mandatory, and using them is unrelated to the effect of the technology.

Just shake it off !

Did you know zebras release stress by shaking?
The Neuron Activation Pod uses vibration frequencies designed to awaken our body's natural way to release stress. The vibration imitates the way a zebra shakes stress out of its body in the savannah after escaping a lion. We humans have lost this ability to shake stress out of our bodies. That is why we need technology to restore this nature shaped intelligence to our bodies and help us get rid of stress. Now you can do it too. Just shake it off.

»

Neurosonic has patents in US and EU for relief of stress-related sleep disorders for temporary and short term adjustment insomnia, jetlag related sleep disorders and transient stress related sleeplessness and shift work related sleep disorders.

scientific research

With global emphasis on sleep, stress management, and recovery, vibration therapy's prominence is rising. We believe it will emerge as a key health promoter, recommending Neurosonic technology based on supporting studies for overall well-being.

SCIENTIFIC BACKGROUND OF VIBRATION

Since 2011, Neurosonic has received extensive customer feedback, affirming the positive impact of vibration on sleep quality, recovery, and stress relief. The tech is supported by robust scientific evidence, enhancing its effectiveness on health. With global emphasis on sleep, stress managment, and recovery, vibration therapy's prominence is rising. We believe it will emerge as a key health promoter, recommending Neurosonic based on supporting studies for overall well-being.

NEUROSONIC'S IMPACT ON SLEEP

Evident from user reports, Neurosonic significantly improves sleep quality and alertness after a few sessions.

Studies Confirming Effects

» Partinen, Markku's 2016 study on The effects of Whole-Body Vibration ther apy on patients with primary insomnia.
» Haapaniemi's 2013 study on Neurosonic's impact on stress and sleep disorders.

METABOLIC BENEFITS

Neurosonic, akin to exercise, revitalizes the body by activating blood circulation, reducing swelling, and enhancing bowel movement. Scientific findings suggest its efficacy rivals exercise, endorsed by top athletes' feedback.

Scientific Research Support

» Meghan E. McGee-Lawrence et al.'s 2017 study on Whole-Body Vibration mimicking exercise effects.
» Kenneth E. Games et al.'s 2015 meta-analysis on Whole-Body Vibra tion's impact.
» Marc T. Hamilton et al.'s 2007 study on the role of low energy expenditure in obesity-related conditions.

NEUROSONIC ACCELERATES RECOVERY

Utilizing vibration, Neurosonic expedites muscle recovery post-exercise, reducing inflammation, enhancing neuromuscular efficiency, and alleviating pain and stiffness. Notably, it positively influences the nervous system.

EVIDENCE SUPPORTING DRUG-FREE RELIEF

Scientific Validation

» Broadbent et al. 2008: "Vibration therapy reduces plasma IL6 and muscle soreness."
» Ikonen 2013: "Acute physiological and subjective effects gained by Neurosonic treatment."
» Seok-Ki et al. 2021: "Effect of whole-body vibration on the sprint ability of athletes."
» Akehurst et al. 2021: "Whole-body vibration decreases delayed onset muscle soreness."

DRUG-FREE RECOVERY WITH NEUROSONIC TECHNOLOGY

Designed to initiate quick and comfortable activation of the body's restorative functions, Neurosonic's innovative technology promotes total relaxation. It is recognized as a drug-free alternative to various pain medications, widely used in Finland for effective pain relief and improved sleep quality.

Q&A

Q **How will this pod revolutionize workplace wellness?**

A Relaxation: The 10-minute relaxation program relieves muscle tension and completely refreshes the mind. As the modern working life becomes busier and more demanding, requiring extra concentration and tolerance to interruptions, the benefits of a short power nap can be enormous. The result, increased efficiency at work and better sleep at home, also improves the quality of life in general.

Activation: The 12-minute activation program increases energy levels and helps with headaches and neck problems. Well-suited for both morning and afternoon use, the activation program is also particularly beneficial for office workers sitting down for extended periods of time. It is a great and refreshing break and time well spent.

It is a well-known fact that insufficient recovery may lead to decreased work efficiency and an increased risk of accidents at work places. Therefore, investing in recovery is easily proven to pay off. Using Neuron Activa tion Pod has a positive effect on the quality of sleep, offering direct savings, as the costs of insomnia are up to tens of millions of euros per year, caused by sickness absences and lowered work efficiency. A valued brand and company image is a must in finding the right experts and keeping them motivated. Investment in the well-being of employees is an important sign of a nimble and forward-thinking company.

Q **Where can the product be used?**

A Basically anywhere. Offices, business parks, schools (teachers and students, especially the hypersensitive benefit from the technology), airports, gyms etc.

Q **Are there statistics that can be used to support the technology?**

A Using for example any wearable device that measure your sleep quality or heart rate variability shows the impact of the therapy.

Q **What is the max height of a person that can comfortably use the pod?**

A We never measured this but we have seen quite tall people use it (over 2 m).

Q **How is it different from a massage chair?**

A The vibration stimulates the nervous system and goes deeper into the body than a mechanical massage. Neu rosonic technology utilizes the body's own functions in the muscles and nervous system, which have the same frequency response as the frequencies used in our devices.

Q **How do I know which program is best for me?**

A The first program to choose is a relaxing program so that the body is not stimulated too much and the body gets used to the vibration. After that, you should familiarize yourself with the programs and choose a pro gram that is suitable for your body and current situation. For those who don't exercise, a longer period with relaxing programs is recommended because activation and recovery programs stimulate the nervous system more and this may activate too much.

Q **How often and for how long should treatment be taken to have an effect?**

A Initially, we recommend at least 2-3 treatments a week for two to three weeks. You can also use the device every day if needed. In most cases, the effect is already apparent in three to five treatments, but some may take longer to respond. If you are in good shape and the quality of your sleep is good, you may not notice any effects. This is perfectly normal.

Q **Whom is the product suitable for?**

A The product can be used by anyone who does not have the conditions mentioned in the contraindications. It will benefit particular people who are stressed, poorly sleeping, those looking for a better recovery and better performance.

Q **How has the technology been used in the past?**

A Neurosonic Finland has 300 service providers mostly in Finland in including Physiotherapists, occupational therapists, Gyms, Psychotherapists. They are selling Neurosonic as a service.
Due to Inventors therapy background there have been many healthcare related customer such as elderly care, rehabilitation day centres or even acute primary care hospital wards

MAINTENANCE &

Safety

TECHNICAL DATA

THE CENTRAL UNIT IS EQUIPPED WITH AN EXTERNAL POWER SUPPLY, WHICH IS CONNECTED TO A WALL SOCKET.

USA & CANADA: 120V, 50/60HZ, 1.3A, UL CERTIFIED
EU AND OTHER REGIONS: 100-240V, 1.3A, 50HZ

SAFETY INSTRUCTIONS

When using an electrical appliance, basic precautions should always be followed, including the following. Read all instructions before using (this appliance).

DANGER – TO REDUCE THE RISK OF ELECTRIC SHOCK ALWAYS UNPLUG THIS APPLIANCE FROM THE ELECTRICAL OUTLET IMMEDIATELY AFTER USING AND BEFORE CLEANING.

WARNING – To reduce the risk of burns, fire, electric shock, or injury to persons:

1. An appliance should never be left unattended when plugged in. Unplug from outlet when not in use, and before putting on or taking off parts.

2. Do not operate under blanket or pillow. Excessive heating can occur and cause fire, electric shock, or injury to persons.

3. Close supervision is necessary when this appliance is used by, on, or near children, invalids, or disabled persons.

4. Use this appliance only for its intended use as described in this manual. Do not use attachments not recommended by the manufacturer.

5. Never operate this appliance if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water. Return the appliance to a service center for examination and repair.

6. Keep the cord away from heated surfaces.

7. Never operate the appliance with the air openings blocked. Keep the air openings free of lint, hair, and the like.

8. Do not use outdoors.

9. Do not operate where aerosol (spray) products are being used or where oxygen is being administered.

10. To disconnect, remove plug from outlet.

WARNING: CONNECT THIS APPLIANCE TO A PROPERLY GROUNDED OUTLET ONLY.

GROUNDING INSTRUCTIONS

This product must be grounded. If it should malfunction or breakdown, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. This product is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances.

DANGER – Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or serviceman if you are in doubt as to whether the product is properly grounded. Do not modify the plug provided with the product – if it will not fit the outlet, have a proper outlet installed by a qualified electrician.

THIS PRODUCT IS FOR USE ON A NOMINAL 120-V CIRCUIT AND HAS A GROUNDING PLUG. MAKE SURE THAT THE PRODUCT IS CONNECTED TO AN OUTLET HAVING THE SAME CONFIGURATION AS THE PLUG. NO ADAPTER SHOULD BE USED WITH THIS PRODUCT.

Although there is already a good amount of research evidence and subjective customer experience on the preventive and healing effects of vibration therapy, the Neuron Activation Pod is not a medical device.

NEURON ACTIVATION POD IS NOT A MEDICAL DEVICE.

The vibration works in the same area as the vibrations of the body's tissues, and because of this, the possibility of side effects is minimal. Some people may experience malaise or headache as side effects, but this usually goes away after 1-2 uses. To avoid discomfort and headaches after using the device, we recom- mend drinking plenty of water.

There are no age restrictions for using the device. If you have epilepsy, migraine, or any other disease affecting the brain and resulting in severe symptoms, do not use activating programs at all. In the above-mentioned situations, we recommend not directing the vibration to the head area at all.

Use the power control carefully because the vibration has a strong effect on body functions. Especially in the case of sleep disorders and various stress symptoms, it is recommended to adjust the power even lower than the basic setting. You should also use the effects of the head and neck area carefully, so at first, remove the effects of the head area completely, especially if the symptom is frequent headaches, migraines, epilepsy, dizziness, or numbness of the hands at night. When you start increasing the power, do it first in the area of the lower limbs. The main thing is that the overall effect of the program is perceived as pleasant. Maximum power should only be used if you want to boost metabolism, blood circulation, and recovery.

DO NOT USE THE PRODUCT IN THE FOLLOWING SITUATIONS:

You have an acute inflammation that can spread
You have an acute herniated disc
You have an acute thrombus
You have an acute cancer
You are pregnant
You have a cold with a fever
You have a risk of retinal or lens detachment
You were vaccinated on the same day
You have a risk of internal bleeding

MAINTENANCE

Do not perform any maintenance yourself, other than as instructed in this manual. If you require technical support, please contact our customer service by e-mail at **info@loookindustries.com**.

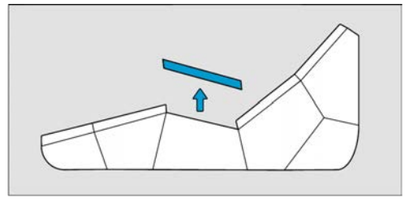
Store the device in a place where it will not be exposed to dust. An accumulation of dust may compromise the functioning of the device. Vacuum the ventilation duct of the central unit of the device 2-3 times per year. This ensures proper ventilation of the device.

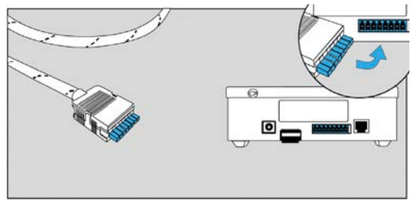
Always check the cleaning instructions for your particular fabric on the relevant fabric supplier's website before you clean or treat your furniture. Regular cleaning is important to maintain the appearance and durability of furnishing fabric. Use a vacuum cleaner to remove dust and debris as soon as possible. Soak up spilt liquid before it dries. To remove stains, work from the outer edge of the stain towards the centre to prevent the stain spreading. Only use cleaning agents designed for textiles. Prior to use, test the cleaning agent on a hidden patch of fabric. Avoid wetting the fabric excessively. Avoid rubbing, because this may damage the fiber in the fabric.

Removable covers are washable as stated in the washing instructions on the fabric supplier's website. Ensure that water or other liquids do not enter the device. Switch the device off by disconnecting it from the wall socket before vacuuming the central unit.

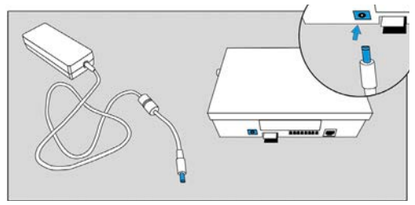
Trouble-shooting

THE DEVICE

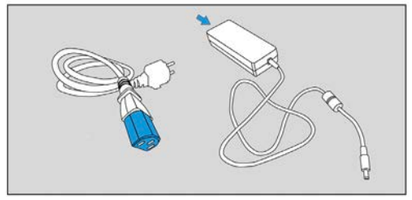




SIGNAL CABLE



POWER CABLE



POWER CABLE

«

If the device does not turn on, check power supply.

Connect the power cord to a wall socket. Check that the device is turned on (green button at the back of the product)

If still not working, remove the middle seat cushion of the device (attached by velcro). Then unscrew and remove the piece of gray pet felt (this piece has attached wiring, so be careful when doing this).

Check that all the required cables and electrical cords are connected to the central unit integrated in the device .

Make sure the device is turned off and disconnected before doing this step. After securing the cables you can connect and turn on the device.

1.

Can’t get tablet and device to connect

A | Cause: Bluetooth connection problem

Solution : Turn off the device, wait for two minutes, then restart

B | Cause: Power issue

Solution: Check power supply, power cord, and connections

2.

No vibration or only partial vibration

A | Cause: Power setting in off mode

Solution: Increase power

B | Cause: Signal cable disconnected/ loose

Solution: Check signal cable connection, reboot device

3.

Program timer works, but the program won’t start

A | Cause: Bluetooth connection problem

Solution: Refer to problem 1

B | Cause: Signal cable poorly connected

Solution: Check signal cable connection, reboot device

4.

Bluetooth search doesn’t find the device

A | Cause: Central unit not powered

Solution: Check power supply, power cord, search/connect again

MORE ABOUT

LoOok Industries

We believe that all the things we surround ourselves with can have a story to tell. It’s up to you to give the products a new meaning.

THINK ABOUT SOME OF THE GREATEST MOMENTS OF YOUR LIFE.

Within the noise of data, a lot of players in the industry lost their own voice. By simply relying to numbers, many forgot to listen to their gut. While consumers are constantly looking for something different, even innovators lack the courage to break the norm.

We say: screw that. In an industry where money dictates what gets to be made, we make what we want. We don’t follow rules, we follow the inspiration – whether it comes during a design meeting or on a sauna bench. Because we are not furniture makers, we are storytellers. We’re here to harness the power of storytelling into a still object. In addition to having a purpose, our products have a personality.

So go: think about some of the greatest moments of your life. That first kiss on an office sofa, sitting down to your chair after nailing a pitch, grabbing a mojito from the table at the secret afterwork party…you know, the moments that create the true value of your environment.

WHAT’S YOUR STORY?

We are not furniture makers: we are storytellers. When designing a product, we want to give it a purpose, a place in this world, a part in a bigger narrative. We want to give interior designers and architects fresh, new paints for their canvases, companies a chance to stand out with a glimpse of our Finnish design DNA.

We believe that all the things we surround ourselves with can have a story to tell. It’s up to you to give the products a new meaning. Because in the end, the worth of a product is not in the name of who designed it, but in the stories you share with it. We measure our worth as LoOok in the stories we get to share with you. So what’s your story?

LIFE’S TOO SHORT FOR NORMAL.

It starts as a simple story; two guys get into a design school. Kevin and Ivar, both vagabonds from the deep south of Finland, arrive on the first day to find out that they’re the only guys in class. Quickly, they realize that not only do they share the same passion for the craft, but also the same tendency to get into trouble.

Refusing to follow norms, the guys follow their intuition. No, not the trusting-the-universe-to-have-my-back kind, but more like a gut feeling that tells what to do, even if it’s not what others would do. Against the odds, the attitude gets them into a winning streak of design awards. It leads them to start a company from scratch.

A year later, same guys sitting at a kitchen table plotting on conquering the world. They call it a design house, but in reality it’s just Kevin’s sister tiny studio apartment, where they’re crashing between parties. There’s a third dude at the table now. They’ve just met Ville, a magical marketing man and soon-to-be partner, who turns out to have a skill of harnessing the two creatives’ rambling minds into a full-blown business.

Fast-forward to present day. The windy city of Helsinki. Same three guys at a table, now with a little more beard and a few more wrinkles. The studio kitchen turned into a kick-ass LoOok headquarters. All grown-up and professional – all still following the same attitude of going “wrong” when everyone else is going right. Here at LoOok, we get older but we will never grow old. We’re not giving up on our wonder and curiosity. We are not furniture makers, we are storytellers. We always design products for a purpose and a narrative. Sure, we might not fit in with the conventional, but you know, what interesting thing ever does?
