Andreu World 70 years

NEW DESIGNS

Manufacturing a Better World

Since 1955, Andreu World has built a strong industrial culture based on excellence in the manufacturing of high-quality seating and tables. Well-crafted design, production expertise, and a deep commitment to sustainability have always been our core values.

For over 70 years, we have grown into an international company, a leader in exports with a presence in key markets around the world. Today, we are a family-owned business with a global outlook and a team of 700 people who share the passion for working on a project driven by commitment, innovation, and responsibility. We operate 4 manufacturing facilities, manage 290,000 m² of industrial space, and maintain 32 showrooms across three continents.

We are proud to be a certified B Corp, which means we are committed to generating a positive impact on people and the planet. We are also a Zero Waste and Carbon Neutral company, with a production model that minimizes waste and significantly reduces our carbon footprint.

This year, we are launching a new edition of our catalog with a completely renewed graphic identity—more visual, intuitive, and editorial in style—clearly conveying our brand essence. The content is now structured around three key pillars: new designs, indoor and outdoor collections, and sustainable materials. This new layout enhances clarity and highlights our ongoing commitment to good design.

The new designs we present have been conceived from the start to be circular. Each collection is created with a second life in mind, prioritizing restoration, reuse, and the extension of each product's useful lifecycle.

Over the decades, we have produced millions of pieces, many of them internationally awarded, with over 130 design accolades to date. But beyond recognition, what truly drives us is the desire to keep growing with authenticity, responsibility, and a forward-looking vision that merges design, innovation, and sustainability.

BOLETE ARMCHAIR

*PATRICIA
URQUIOLA*

NEW
DESIGNS

The new version of the Bolete armchair reinterprets the bold and original spirit of the collection with a design that stands out for its visual presence and striking character. Inspired by pop aesthetics and in harmony with contemporary architecture, its fluid silhouette creates unique spaces in both public and private settings.

Its comfortable, enveloping upholstered shell adapts precisely to the body, while the backrest, which flows from the base, creates a continuous, distinctive shape. The lightweight, stable central base completes this elegant design.

With an innovative construction approach, its base is characterized by its organic shape and grooved texture, made from Pure ECO® thermopolymer, a 100% recycled and recyclable material. Along with its thoughtful geometry and generous proportions, it guarantees a high level of ergonomics and comfort.

Bolete Armchair fuses design, technology, and sustainability in an iconic piece that expresses a new way of inhabiting spaces.

The Bolete Armchair stands out for its wrap-around design and integrated armrests, offering superior comfort. Available in ten base colors—white, black, basalt gray, dark gray, brown terracotta, clay brown, olive green, rust red, or mist blue—it adapts to various spaces such as waiting rooms or the home. It can be upholstered in a wide range of fabrics or leather, expanding its aesthetic and functional possibilities.

Bolete features a handle on the backrest and wheels at the base for easy movement. The wheels offer agile and comfortable mobility. A weight-activated brake system ensures stability when seated.

NEW
DESIGNS

In today's work environments, where the boundaries between formal and informal are blurred, Next Executive emerges as a lounge chair solution that responds to new professional needs.

Designed for comfort during prolonged use, it features two backrest heights—medium and high—and an ergonomic structure constructed with different densities of foam to ensure an enveloping and healthy seating experience. Its swivel base includes a tilt mechanism as standard, promoting mobility and postural wellbeing, essential qualities in dynamic offices.

Designed for meetings and collaboration, Next Executive combines distinguished elegance and functionality. Its customizable upholstery with technical and sustainable fabrics, combined with its circular construction—with easily removable and recyclable components—reinforce its commitment to durability and environmental respect. A versatile piece that raises the standard of corporate comfort.

Next Executive is available in a variety of base configurations to suit different needs. There is the 4-blade aluminum swivel base, ideal for executive spaces. Another possibility is the 5-wheeled swivel base with height adjustment, available in white, black, or polished aluminum finishes. In addition, there is an option with a 5-wheeled thermopolymer swivel base in black, perfect for functional and heavy-duty use.

VELO
CHAIR

*BENJAMIN
HUBERT*

NEW
DESIGNS

Velo Chair reinterprets the task chair in a sophisticated, ergonomic, and visually fluid way. Designed for hybrid work, it adapts to offices, coworking spaces, or home offices thanks to its compact and organic silhouette.

This design comes in two versions, with and without armrests. The armrests are available in standard or 4D versions and are complemented by integrated lumbar support for personalized comfort.

The seat structure, backrest, and base (also available in aluminum) are made from PURE ECO® thermopolymer, which is 100% recycled and recyclable, reaffirming our commitment to responsible design.

The contoured backrest, available in breathable mesh or fully upholstered, offers postural support with a refined aesthetic. It incorporates a tilt mechanism activated by the user’s weight, providing dynamic support without the need for adjustments. The seat includes depth adjustment and the armrests are width-adjustable to provide greater ergonomics.”

Velo Chair is a functional and elegant solution designed for spaces that prioritize mobility, comfort, and sustainability.

*Optional: 2D armrests (width and height adjustable), 4D armrests (width, height, pad rotation, and pad depth adjustable), and aluminum base available in 10 colors.

**NINA
LOUNGE**

***PATRICIA
URQUIOLA***

**NEW
DESIGNS**

Nina Lounge is a sumptuous lounge chair that stands out for its soft, sculptural silhouette and strong visual identity. Its shape is inspired by a continuous curve that folds in on itself like a ribbon, creating an enveloping organic form. This shape with its wide seat and no armrests give it a strong presence without sacrificing warmth or comfort, making it ideal for both residential and professional spaces.

The design pays homage to the expressive freedom of 1970s furniture, when bold shapes and tactile materials defined a new language. In this context, the upholstery takes center stage: rich in texture and carefully adapted to the curved lines of the piece, it enhances both its comfort and visual warmth.

Its back features a distinctive organic “orange skin” texture, giving it a unique tactile and visual character. The interior, upholstered and padded with high-quality technical foams, guarantees a comfortable, ergonomic, and wraparound seating experience.

Only available in a one-seater version.
Its central structure, which acts as a support for the upholstered part to keep it suspended, is made of 100% recycled and recyclable Pure ECO® thermopolymer.

IN OUT
OFFICE 90

*ALFREDO
HÄBERLI*

NEW
DESIGNS

The new In Out Office 90 expands the possibilities of the original system with a more intimate and functional approach. This redesign, combined with sound-absorbing materials and technical foams, turns each piece into a capsule of concentration and wellbeing.

Ideal for open offices, collaborative spaces, and meeting areas in hybrid environments, it combines modularity and mobility with a refined design. The new module allows you to create corner configurations and wraparound structures that complement the rest of the In Out Office system, such as ottomans with wheels and automatic brakes; two-height tables with integrated power and USB ports; and 1-, 2-, and 3-seater armchairs and sofas.

It also commits to sustainability through a fully dismantlable design and the use of recyclable materials. An innovative solution that balances design, technology, and multisensory comfort.

The new 90-degree configuration allows for corner or closed configurations, optimizing space and privacy. It offers rear panels in two heights, fixed or cushioned backrests, tables with integrated power, and mobile ottomans with brakes. All with customizable upholstery options and sustainable design, conceived for contemporary hybrid spaces.

**GALA
LOUNGE**

***PIERGIORGIO
CAZZANIGA***

**NEW
DESIGNS**

This fully upholstered lounge chair stands out for its welcoming silhouette and clean lines, offering superior comfort thanks to its foam shell with varying densities. Gala Lounge is inspired by great contemporary classics, reinterpreting them with a sober and sophisticated aesthetic, ideal for both contract and residential spaces.

Its versatile design allows you to create welcoming atmospheres in waiting areas, lobbies, common areas, or reading corners. Available in a carefully selected range of sustainable upholstery and with a choice of bases with four metal legs or a central support in wood or aluminum.

Gala Lounge perfectly combines functionality and aesthetic character. Furthermore, it reaffirms Andreu World's environmental commitment through the use of recycled materials and carbon-neutral manufacturing processes. Gala Lounge is the perfect synthesis of comfort, conscious design, and durability, ready to blend harmoniously into the most demanding spaces.

Gala Lounge is available in three base versions: a 4-legged solid wood base, a 4-legged metal base (pending approval), and a central 4-blade aluminum swivel base. All options can be fully upholstered in any of the fabrics from the Andreu World catalog, including textiles from the Circular One® collection. This flexibility ensures perfect adaptation to a wide range of interior design styles.

FLEX EXECUTIVE CIRCULAR

*PIERGIORGIO
CAZZANIGA*

NEW
DESIGNS

Flex Executive Circular evolves with the addition of a new backrest in FSC® 100% oak plywood. This evolution is based on two key aspects: a redesign of the construction and the use of natural wood. The redesign eliminates the use of glues, allowing the components to be dismantled and recycled, in line with the principles of the circular economy.

The oak provides a warm, sophisticated and timeless aesthetic, enriching the executive character of the chair. Its advanced ergonomics and high level of comfort are maintained, offering wellbeing in offices, boardrooms and contract spaces.

The backrest can be upholstered in the entire range of Andreu World fabrics or in sustainable textiles from the Circular One® collection, expanding your customization options.

Flex Executive Circular combines technical innovation, environmental awareness and formal refinement, consolidating its position as the ideal choice for projects that value design, ergonomics and environmental responsibility.

It is offered in three seat heights: low, medium, and high. It is available with a 4-blade aluminum swivel base, with 5 metal wheels or Pure ECO® thermopolymer wheels.

ORU
SOFA

*PATRICIA
URQUIOLA*

NEW
DESIGNS

The Oru collection expands with a new two-seater sofa version that preserves its iconic identity and timeless character. Inspired by 1970s design and Japanese aesthetics, this sofa combines bold form with great functionality.

Its distinctive three-legged structure in solid FSC® ash reinforces its visual and artisanal stability, while the upholstered backrest ensures exceptional comfort. It offers a compact and elegant solution for lounge areas, reception areas, collaborative offices, and residential spaces. Its optimized ergonomics, the quality of the foams in various densities, and the internal elastic straps provide a comfortable and long-lasting user experience.

In addition, Oru Sofa follows the principles of ecodesign, with easily separable and recyclable components, reaffirming Andreu World's commitment to sustainability. It is a piece that combines iconic design, comfort, and environmental responsibility for contemporary projects.

It retains the iconic three-legged base in solid FSC® ash wood and the upholstered backrest. The sofa offers customization options for upholstery, allowing finishes and fabrics from the Andreu World collection to be adapted, including sustainable textiles from Circular ONE®, to suit different styles and settings.

SF2278

Sofa with solid ash wood frame and either upholstered seat or upholstered seat and backrest.

NEXT
LOUNGE

*PIERGIORGIO
CAZZANIGA*

NEW
DESIGNS

Next Lounge introduces a new version with a four-legged metal base, available in three finishes: white, black, and chrome, giving the design a lighter, more contemporary feel. This update redefines the aesthetics of this armchair, highlighting its wraparound upholstery and fluid silhouette with an elegant and subtle structural line.

The metal base enhances stability and gives it an architectural presence, perfect for integration into contract and residential projects seeking sophistication and modernity. It maintains its exceptional comfort thanks to the combination of different densities of foam, Next Lounge remains a haven of wellbeing and style. Its ergonomics and the quality of its upholstery ensure a long-lasting and pleasant user experience.

This new option joins the existing bases in the collection, expanding its versatility to adapt to both contract and residential projects. The design of the metal base enhances the elegance and visual lightness of the chair, maintaining its unmistakable comfort and wraparound character.

BRANDY
STOOL

LIEVORE
ALTHERR MOLINA

NEW
DESIGNS

Brandy Stool is the latest addition to the collection, designed to bring elegance and functionality to restaurant, contract, and domestic spaces.

Available in two heights, this stool combines an wraparound structure made of oak plywood upholstered with flexible foam and a seat with elastic straps that provides lasting comfort. You can choose between metal bases—sled or tubular—and 4-legged bases in solid beech wood. The upholstery is fully customizable, allowing it to be adapted to any style or environment. It stands out for its elegant design, structural robustness, and versatility.

In addition, it has been developed under the principles of the circular economy: it uses FSC®-certified wood, easily separable and recyclable materials, and low-impact manufacturing processes, thus extending its useful life cycle with a responsible approach.

The various versions combine functionality and design. It is available in high or low models with a sled base or a 4-legged swivel base finished in polished chrome, white, or black or with a solid beech wood frame. It also includes an option for a central height-adjustable swivel base. All options include an upholstered seat and backrest, ensuring comfort and versatility.

FLEX EASY CHAIR

*PIERGIORGIO
CAZZANIGA*

NEW
DESIGNS

The Flex collection has been expanded with the new Flex Easy Chair, an upholstered armchair that reinterprets the visual and iconic language of the collection, now with a wider and more robust design. It is designed to offer greater comfort and ergonomic support in public spaces, waiting areas, or contract environments.

This version retains the depth of the original seat but significantly increases the width of the backrest and seat, providing an encompassing feel and greater comfort. Its four-legged metal structure in stainless steel, along with its integrated armrests, ensures maximum stability. It incorporates high-density technical foam that ensures durability and support even with intensive use.

Available exclusively in a fully upholstered version, it can be customized with a wide selection of fabrics from the Flex collection, adapting to a variety of projects and styles. It offers ergonomics, resistance, and an elegant aesthetic, ideal for those seeking inclusive and contemporary solutions without compromising on design.

It can be configured with all the fabrics and leathers in the Flex collection, allowing it to be adapted to various contract, lounge, or waiting area environments that require robust and elegant solutions.

New Designs

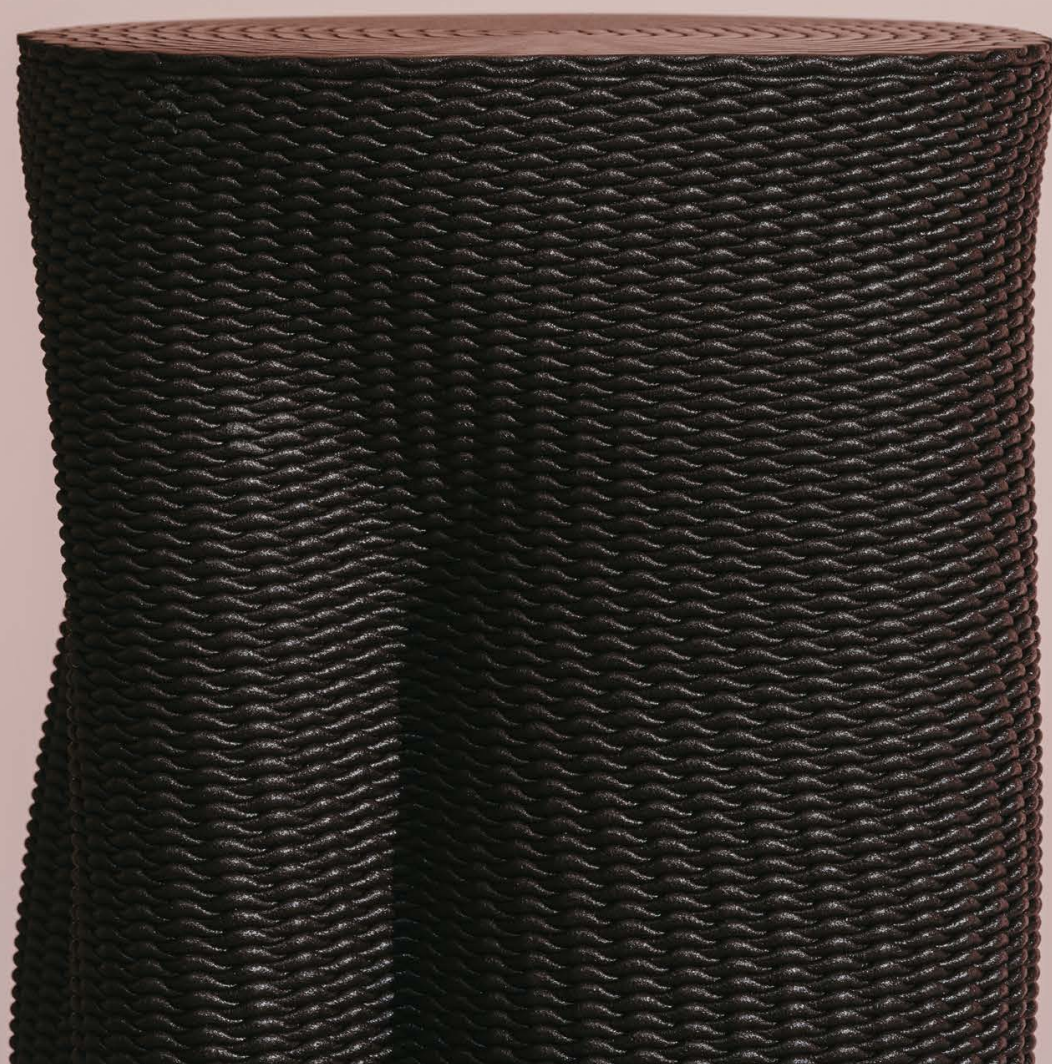

VALENCIA STOOL

*PATRICIA
URQUIOLA*

NEW
DESIGNS

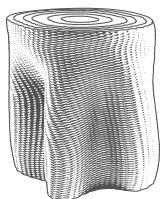

It is a unique piece that combines design, innovation, and sustainability. Manufactured using large-format robotic 3D printing, the process employs industrial arms with pellet extruders capable of creating sculptural shapes with millimeter precision. The material, a blend of 100% biodegradable BIO® thermopolymer and crushed natural cork, offers a soft texture, an organic tone, and a natural aroma, evoking the materiality of cork.

In addition, it is a charitable project: its profits go to supporting the local community affected by the Dana storms in Valencia. Valencia Stool is more than a functional object; it is a statement of responsible design.

With only one form available in an earth brown tone, the Valencia Stool blends into contemporary interiors, from homes and collaborative areas to waiting areas or lobbies and public environments.

BQ1029
Stool made from BIO®
thermopolymer with an

NEW OAK BACKRESTS

NEW DESIGNS

New Oak Backrests

New Designs

Andreu World elevates its Executive collection series by incorporating a new finish in 100% FSC® oak plywood for the backrests of the Flex, Capri, Alya, Gala and Calma collections. This update brings a natural, warm, and sophisticated aesthetic that enriches the distinctive character of each design.

The oak plywood is precisely integrated, enhancing the craftsmanship and formal presence of these iconic pieces. In addition to its aesthetic value, this addition reflects a circular economy approach: the manufacturing process eliminates the use of glues, allowing for easy disassembly to facilitate the reuse and recycling of materials.

This new development reinforces the commitment to sustainability and conscious design, positioning the Executive chairs as benchmarks in ergonomics, elegance, and environmental responsibility.

New FSC® 100% oak plywood backrest options are now available for all versions of the Executive chairs: Flex, Capri, Alya, Gala and Calma. The update is still compatible with current bases, thus expanding the possibilities for aesthetic customization in corporate and contract projects.

Available in the following collections:

- Flex Executive
- Capri Executive
- Alya Executive
- Gala Executive
- Calma Chair

FUSION TABLE

*RODOLFO
DORDONI*

NEW
DESIGNS

Fusion Table represents a perfect balance between technical sophistication and timeless aesthetics. Designed to meet the demands of contemporary spaces, Fusion Table stands out for its clean design, carefully studied modularity, and functional purpose.

Fusion Table can be finished with a wide range of tabletops in materials such as natural oak, lacquer, technical stone, marble, ultramatte, glass, or laminate, adapting to diverse interior design styles, from residential to corporate and contract.

It is available in fixed versions with lengths of up to 3,400 mm/133.5 in. The tops also incorporate advanced connectivity options: power sockets, USB ports, and multimedia connections, all discreetly integrated. Fusion Table meets criteria for quality, durability, and contemporary design, making it a refined, functional meeting place that is prepared for the most demanding environments.

Fusion Table is available in fixed and extendable versions, with a polished aluminum frame or in metallic finishes: champagne, steel, copper, and gold. The tabletops are available in oak, lacquered, technical stone, marble, ultra-matte, glass, or laminate. Sizes range from 1400x900 mm (55x35.5 in) to 3400x1200 mm (133.5x47.5 in).

TRIADA LIFT OCCASIONAL TABLE

*BENJAMIN
HUBERT*

NEW
DESIGNS

This is a new interpretation of the side table, designed to respond to the fluidity between life and work. Its minimalist and functional design incorporates a lightweight aluminum base combined with a rectangular top in oak, walnut, or lacquered wood. Its distinctive feature is its adjustable height system, between 495 mm and 695 mm, which allows it to adapt to different uses—from laptop support in collaborative environments to an informal surface in lounge areas or contract spaces.

Thanks to its cantilevered structure and asymmetrical base, Triada Lift slides easily under armchairs or sofas, optimizing ergonomics and access. Its rectangular top provides aesthetic and functional versatility.

Developed according to ecodesign principles, Triada Lift Occasional combines practicality and elegance, proving that design can also be agile, adaptable, and environmentally friendly.

This functional flexibility and variety of finishes make it ideal for collaborative, contract, or residential interiors.

GARZETTA OCCASIONAL TABLE

AFTERROOM

NEW
DESIGNS

Garzetta represents the perfect combination of versatility, elegance, and innovation. It adapts harmoniously to various environments thanks to its interchangeable base system and a wide range of tabletops.

Its design allows for intuitive customization, transforming each space into a dynamic and coherent environment. With a lightweight yet sturdy construction, Garzetta balances functionality and aesthetics, offering unlimited possibilities.

Its exclusive universal connection system makes it easy to adapt to any space, functioning individually or collectively. The variety of heights, shapes, and finishes make it a versatile solution for multiple contexts.

It can be used individually or collectively, as an occasional table, a central table, or as an addition to common areas, making it adaptable to all kinds of uses and offering elegant solutions for offices, waiting rooms, collaborative areas, and also for the home.

It is available in three heights and a double height version, offering great versatility. Its bases, available in 4-legged and 6-legged versions made from 100% recycled aluminum, can accommodate round, bean, Delta and Double Delta tops. Finishes are available in glass, technical stone, marble, compacto HPL, and oak wood. Its dismountable structure optimizes transport, reduces the carbon footprint, and allows for responsible recycling thanks to the use of recyclable aluminum.

ORU OCCASIONAL TABLE

*PATRICIA
URQUIOLA*

NEW
DESIGNS

The large-diameter version of Oru Occasional enriches the collection with new proportions that enhance its visual and functional impact.

With a solid ash wood base and oak tops, this side table maintains the sculptural character and natural warmth that define the Oru family. Its simple, organic, and robust design combines clean lines with noble materials, creating a timeless piece that is perfect for lounge spaces, waiting areas, collaborative environments, or residential interiors. Thanks to its greater diameter –up to Ø1,400 mm/55 in– and height options of 350 mm/13 in or 450 mm/ 17 in, this table becomes a gathering place, support surface, or high-impact decorative element.

Manufactured to sustainability standards and with FSC®-certified materials, Oru Occasional stands out for its durability and serene, balanced aesthetic that fits naturally into projects seeking simple beauty, an artisanal feel, and respect for the environment.

REVERSE
OCCASIONAL 45
TABLE

*PIERGIORGIO
CAZZANIGA*

NEW
DESIGNS

Reverse Occasional 45 is the compact version of Andreu World's iconic Reverse collection, adapted to offer auxiliary solutions with the same structural elegance.

Its central base, available in five colors of thermopolymer Pure ECO®, maintains the distinctive sculptural shape that characterizes the series. The top can be chosen from a wide range of materials: oak, lacquered, compacto HPL (decorative or premium), Technical stone, Solid Surface, or marble. This combination of finishes allows Reverse Occasional 45 to be integrated into a wide variety of projects, from lounge spaces, reception areas, and waiting areas to residential interiors. This piece offers versatility, stability, and impeccable aesthetics.

Its manufacture follows the principles of circular economy, with easily recyclable components and FSC®-certified materials. Reverse Occasional 45 is a refined design, conceived to complement contemporary environments with functionality and lasting beauty.

UP OCCASIONAL TABLE

NEW
DESIGNS

Up Occasional is a new side table designed to bring dynamism, functionality, and refined aesthetics to interior spaces.

Its main feature is the hidden piston system that allows the height of the tabletop to be adjusted smoothly, easily adapting to various situations, from informal work to moments of relaxation. The aluminum structure guarantees stability and resistance, while the round tabletop, available in oak, walnut, or lacquered finishes, adds warmth and sophistication. Its compact size makes it ideal for lounge environments, waiting areas, collaborative spaces, and even residences. Its clean, timeless and adaptable design responds to new lifestyles that combine functionality and elegance.

Manufactured according to ecodesign principles, it is a sustainable, versatile and circular piece.

**SOLID OCCASIONAL
TABLE**

**NEW
DESIGNS**

Solid Occasional is the new side table version of the Solid collection which transfers its characteristic elliptical language to a compact, functional, and extremely versatile format.

Its central base, available in five of the Pure ECO® thermopolymer colors, cement, or wood, provides a sculptural presence and great structural stability. The top, available in oak, lacquer, marble, Technical Stone, Solid Surface or decorative/premium Compact HPL, allows for multiple aesthetic combinations. With a wide range of sizes and heights Solid Occasional adapts naturally to lounge environments, waiting areas, residences, or collaborative spaces. It also offers optional integrated connectivity and power solutions, ideal for offices or public areas.

Manufactured according to circular economy and ecodesign principles, Solid Occasional is a sustainable, durable, and elegant table that reflects the conceptual and formal solidity of the original collection, providing a functional and expressive addition to contemporary design.

Solid Occasional is available in various sizes: Ø900 mm / 35 in to Ø1400 mm / 55 in, and heights of 350 mm/13 in or 450 mm/ 17 in.

ELEMENT CREDENZA DOUBLE SIDED

NEW
DESIGNS

135

The new version of Element Credenza redefines functionality in storage furniture. Designed for open spaces, this credenza offers access from both sides, allowing it to be used as a centerpiece or as a room divider in offices, meeting rooms, or common areas.

Its design combines an exterior body in oak, walnut, or lacquered finishes with a lightweight metal structure in black, white, or shiny chrome. It stands out for its sober formal presence, clean lines, and large storage capacity, with versions up to 3 meters long/119.5 in. It has been developed using ecodesign criteria and FSC®-certified wood, guaranteeing durability, recyclability, and sustainability.

It is a versatile, elegant, and functional piece, designed to respond to the new needs of collaborative, flexible, and well-organized spaces.

It is available in four sizes: 1536 mm (60.5 in), 2036 mm (80.0 in), 2536 mm (99.5 in), and 3036 mm (119.5 in). The optional top surface is available in technical stone, marble, or glass. This version with double-sided access makes it ideal for dividing and equipping open layouts.

CONNECT COUNTER TABLE

NEW
DESIGNS

Connect Counter is the new high version of this versatile table system, specifically designed in a Y and T shape to offer a functional and stylish solution for customer service areas, coworking spaces, hospitality, or common areas. Its white, black, or polished aluminum structure provides strength and elegance, while the top and outer body—available in oak, walnut, lacquered, laminated, or ultramatte finishes—offer a wide variety of aesthetic combinations.

Available in a height of 900 mm/ 35 in and a length of up to 2,100 mm/ 82 in, Connect Counter adapts precisely to the operational and spatial requirements of each project. Its clean, modular design facilitates integration into contemporary environments that require order, accessibility, and visual presence. This table is ecodesigned and manufactured 100% for the circular economy, with recyclable materials and sustainable processes.

Its modular design offers easy and elegant integration into operational and customer service spaces.

BREZAL EASY CHAIR

*PATRICIA
URQUIOLA*

NEW
DESIGNS

Brezal Easy Chair expands Andreu World's Brezal collection with a new lounge chair designed to maximize comfort in outdoor spaces.

Taking Mediterranean inspiration, it combines craftsmanship and technology using a lightweight aluminum structure, available in 12 colors, treated for outdoor use and enhanced with sophisticated artisanal hand-woven technical cord available in 11 colors. Its generous proportions and the option to include upholstered cushions on the seat and backrest ensure a superior relaxation experience, making it ideal for terraces, patios, chill-out areas, or contract spaces.

Available in different shades for the structure and multiple finishes for the cord, Brezal Easy Chair stands out for its weather resistance and timeless elegance.

Furthermore, it has been designed according to ecodesign criteria, using recyclable materials and sustainable manufacturing processes, which guarantees a long service life with low environmental impact. A piece that combines visual lightness, structural strength, and iconic aesthetics.

Brezal Easy Chair is available in a unique lounge chair version with corded backrest seat.

BU2367

Lounge chair with corded seat and backrest available in several colors on an aluminum frame available in various colors. Optional upholstered seat cushion.

BREZAL STOOL

*PATRICIA
URQUIOLA*

NEW
DESIGNS

Brezal Stool is the latest addition to Andreu World's Brezal collection, designed to offer elegance, functionality, and durability in outdoor spaces. Inspired by the visual lightness of traditional Mediterranean wicker, this slender stool combines a weather-treated aluminum structure, available in 12 colors, combined with hand-woven technical cord, offered in a selection of 11 colors.

Its contemporary design brings a sense of warmth, perfect for terraces, bars, lounges, or outdoor residential spaces. Available in two heights—Bar Stool and Counter Stool—it easily adapts to a variety of configurations. The seat can be fully corded or incorporate an upholstered cushion for added comfort.

Thanks to its environmentally friendly manufacturing and recyclable materials, the Brezal Stool guarantees durability, resistance to harsh weather conditions, and low environmental impact. A versatile piece that combines traditional craftsmanship and modern technology to enrich any outdoor project.

BOLETE LOUNGE BIO® OUTDOOR

*PATRICIA
URQUIOLA*

NEW
DESIGNS

Bolete Lounge BIO® Outdoor expands Andreu World's Bolete collection to the outdoors, preserving its organic and enveloping essence. Designed to withstand outdoor conditions without compromising comfort or sculptural aesthetics, this lounge chair features a structure made from BIO® thermopolymer, combined with open-cell foam fillings that allow for quick and efficient water drainage.

Its curved and generous silhouette invites you to rest and relax on terraces, in gardens, contract spaces, or outdoor lounge areas. Available in several natural colors, its central base emphasizes formal continuity with the rest of the collection. In addition, its modular design allows for multiple compositions.

Bolete Lounge BIO® Outdoor is a piece that combines advanced sustainability, ergonomic comfort, and contemporary visual language, reaffirming Andreu World's commitment to environmentally friendly design and outdoor living.

BREZAL DINING TABLE

*PATRICIA
URQUIOLA*

NEW
DESIGNS

Brezal Dining is the new outdoor dining table from the Brezal collection, designed by Patricia Urquiola. Inspired by the Mediterranean tradition of hand-woven craftsmanship, this table combines an aluminum structure with technical rope details, adding texture, warmth, and a strong visual identity.

Its rectangular tabletop design is available in various sizes up to 3,000 mm/ 118 in long, making it the ideal gathering place for private terraces, restaurants, and common areas in contract settings. The tabletops are available in technical stone, terrazzo, and compacto HPL, materials that guarantee weather resistance, durability, and a refined aesthetic. The structure, available in a range of colors, include polyamide stoppers that protect both the base and the floor.

Manufactured according to ecodesign criteria, Brezal Dining represents a perfect balance between craftsmanship, technology, and sustainability for outdoor living.

The Brezal Dining table is available in a rectangular format with an EPL5 aluminum frame in a wide range of colors that can be combined with new outdoor cord colors. The tabletops are available in technical stone, terrazzo marble, or compacto HPL. Ideal for residential or contract outdoor use.

BOLETE OUTDOOR TABLE

*PATRICIA
URQUIOLA*

NEW
DESIGNS

Designed by Patricia Urquiola, it brings the iconic essence of the Bolete collection to the outdoor environment, combining sculptural shapes with highly resistant and sustainable materials.

Its base, made from recycled Pure ECO® thermopolymer, features a grooved geometry that adds character and stability. The tops are available in technical stone, terrazzo, compacto HPL or cement finished, materials chosen for their durability and aesthetic appeal. This table is available in a wide variety of formats—round, square, rectangular, elliptical, and boat—with lengths up to 3,000 mm/118 in, making it a centerpiece for meetings, outdoor dining areas, and contract terraces.

Manufactured according to circular economy principles, Bolete Conference Outdoor is weather-resistant, recyclable, and visually striking, perfect for projects that require durable, sophisticated, and sustainable outdoor solutions.

BOLETE CAFÉ OUTDOOR

*PATRICIA
URQUIOLA*

NEW
DESIGNS

Bolete Café Outdoor is the most versatile and compact interpretation of the Bolete collection, adapted for outdoor use. Designed by Patricia Urquiola, this table maintains the sculptural identity of the T-shaped base, made from 100% recycled Pure ECO® thermopolymer.

The tabletops are available in resistant materials such as technical stone, terrazzo, compacto HPL, and cement finished, ensuring durability and beauty in weather-exposed contexts. Thanks to its expressive design and small scale, Bolete Café Outdoor is the ideal choice for terraces, cafés, common areas, and contract spaces. Its aesthetic presence reinforces the identity of space, while its lightweight and resistant structure allows for ease of use and maintenance.

Manufactured according to ecodesign criteria and using recyclable materials, this piece offers a perfect balance between design, functionality, and commitment to sustainability.

NEW MATERIALS

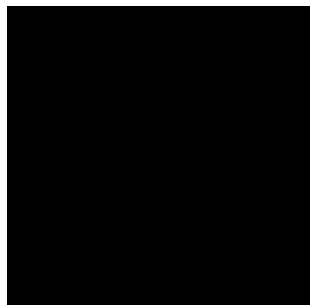

COMPACT HPL

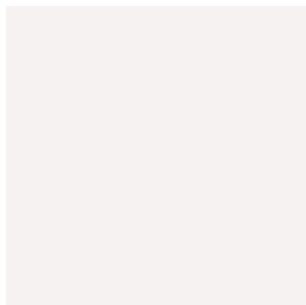

The collection of compact HPL tops has been updated with new colors, organized into three distinct ranges: the basic finishes – white and black; the decorative tones – Carrara white and Marquina black; and the premium compacts – sand, rock grey, and iroko.

Basic and premium finishes are available in both indoor and outdoor collections.

CEMENT

Now available for indoor and outdoor tables in versions for side tables, coffee tables, dining tables, and bar tables. This finish provides an architectural and material aesthetic. Its five colors—gray, terracotta, black, off-white, and dark basalt gray—add a mineral texture and make each piece a solid and refined base.

THERMOPOLYMER

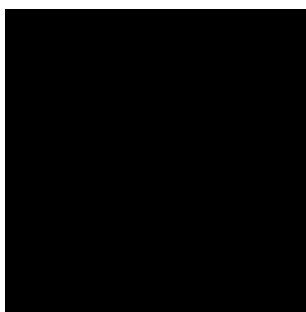

PURE ECO®

BIO®

The selection of Pure ECO® and BIO® thermopolymer finishes has been updated with ten carefully chosen colors to offer a balanced range of neutral tones, warm hues, and contemporary color accents. This palette consists of white, black, basalt gray, sand, dark gray, terracotta brown, clay brown, olive green, rust red, and mist blue. This chromatic diversity allows plastic parts to be integrated naturally into both indoor and outdoor spaces, maintaining a uniform, versatile, and timeless aesthetic.
