Founder & Managing Director

Welcome to our world of ergonomics

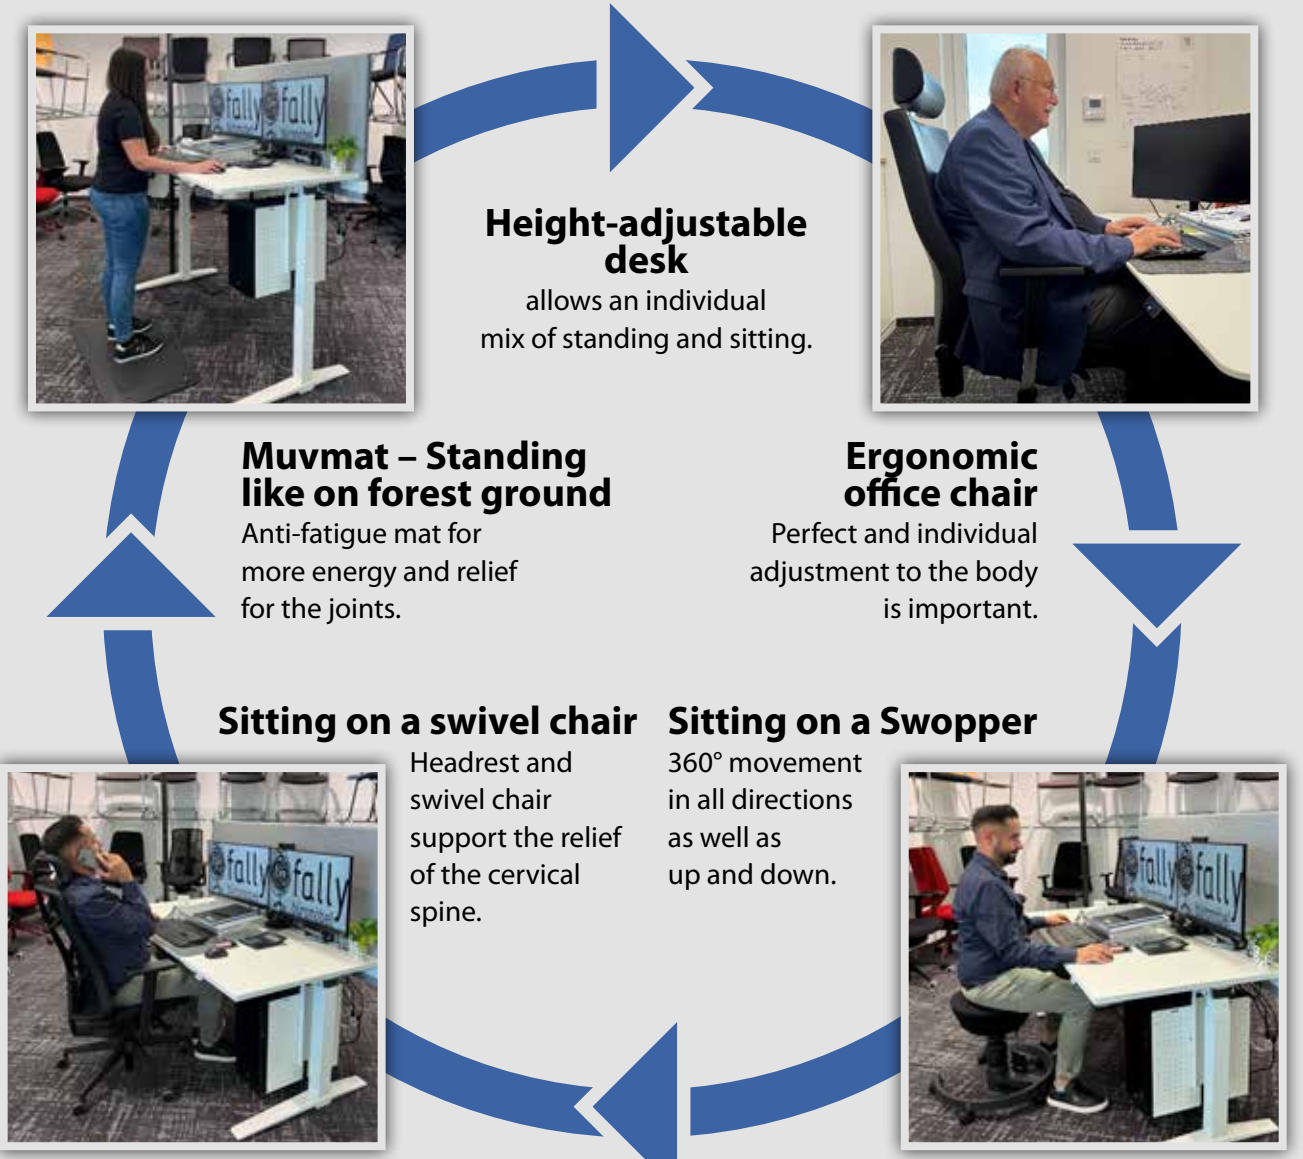

Electrostatic Discharge (ESD)

Disinfectant-resistant

Easy to clean

Cleanroom-compatible

Peter H. Feldmann
System Ergonomics Coach

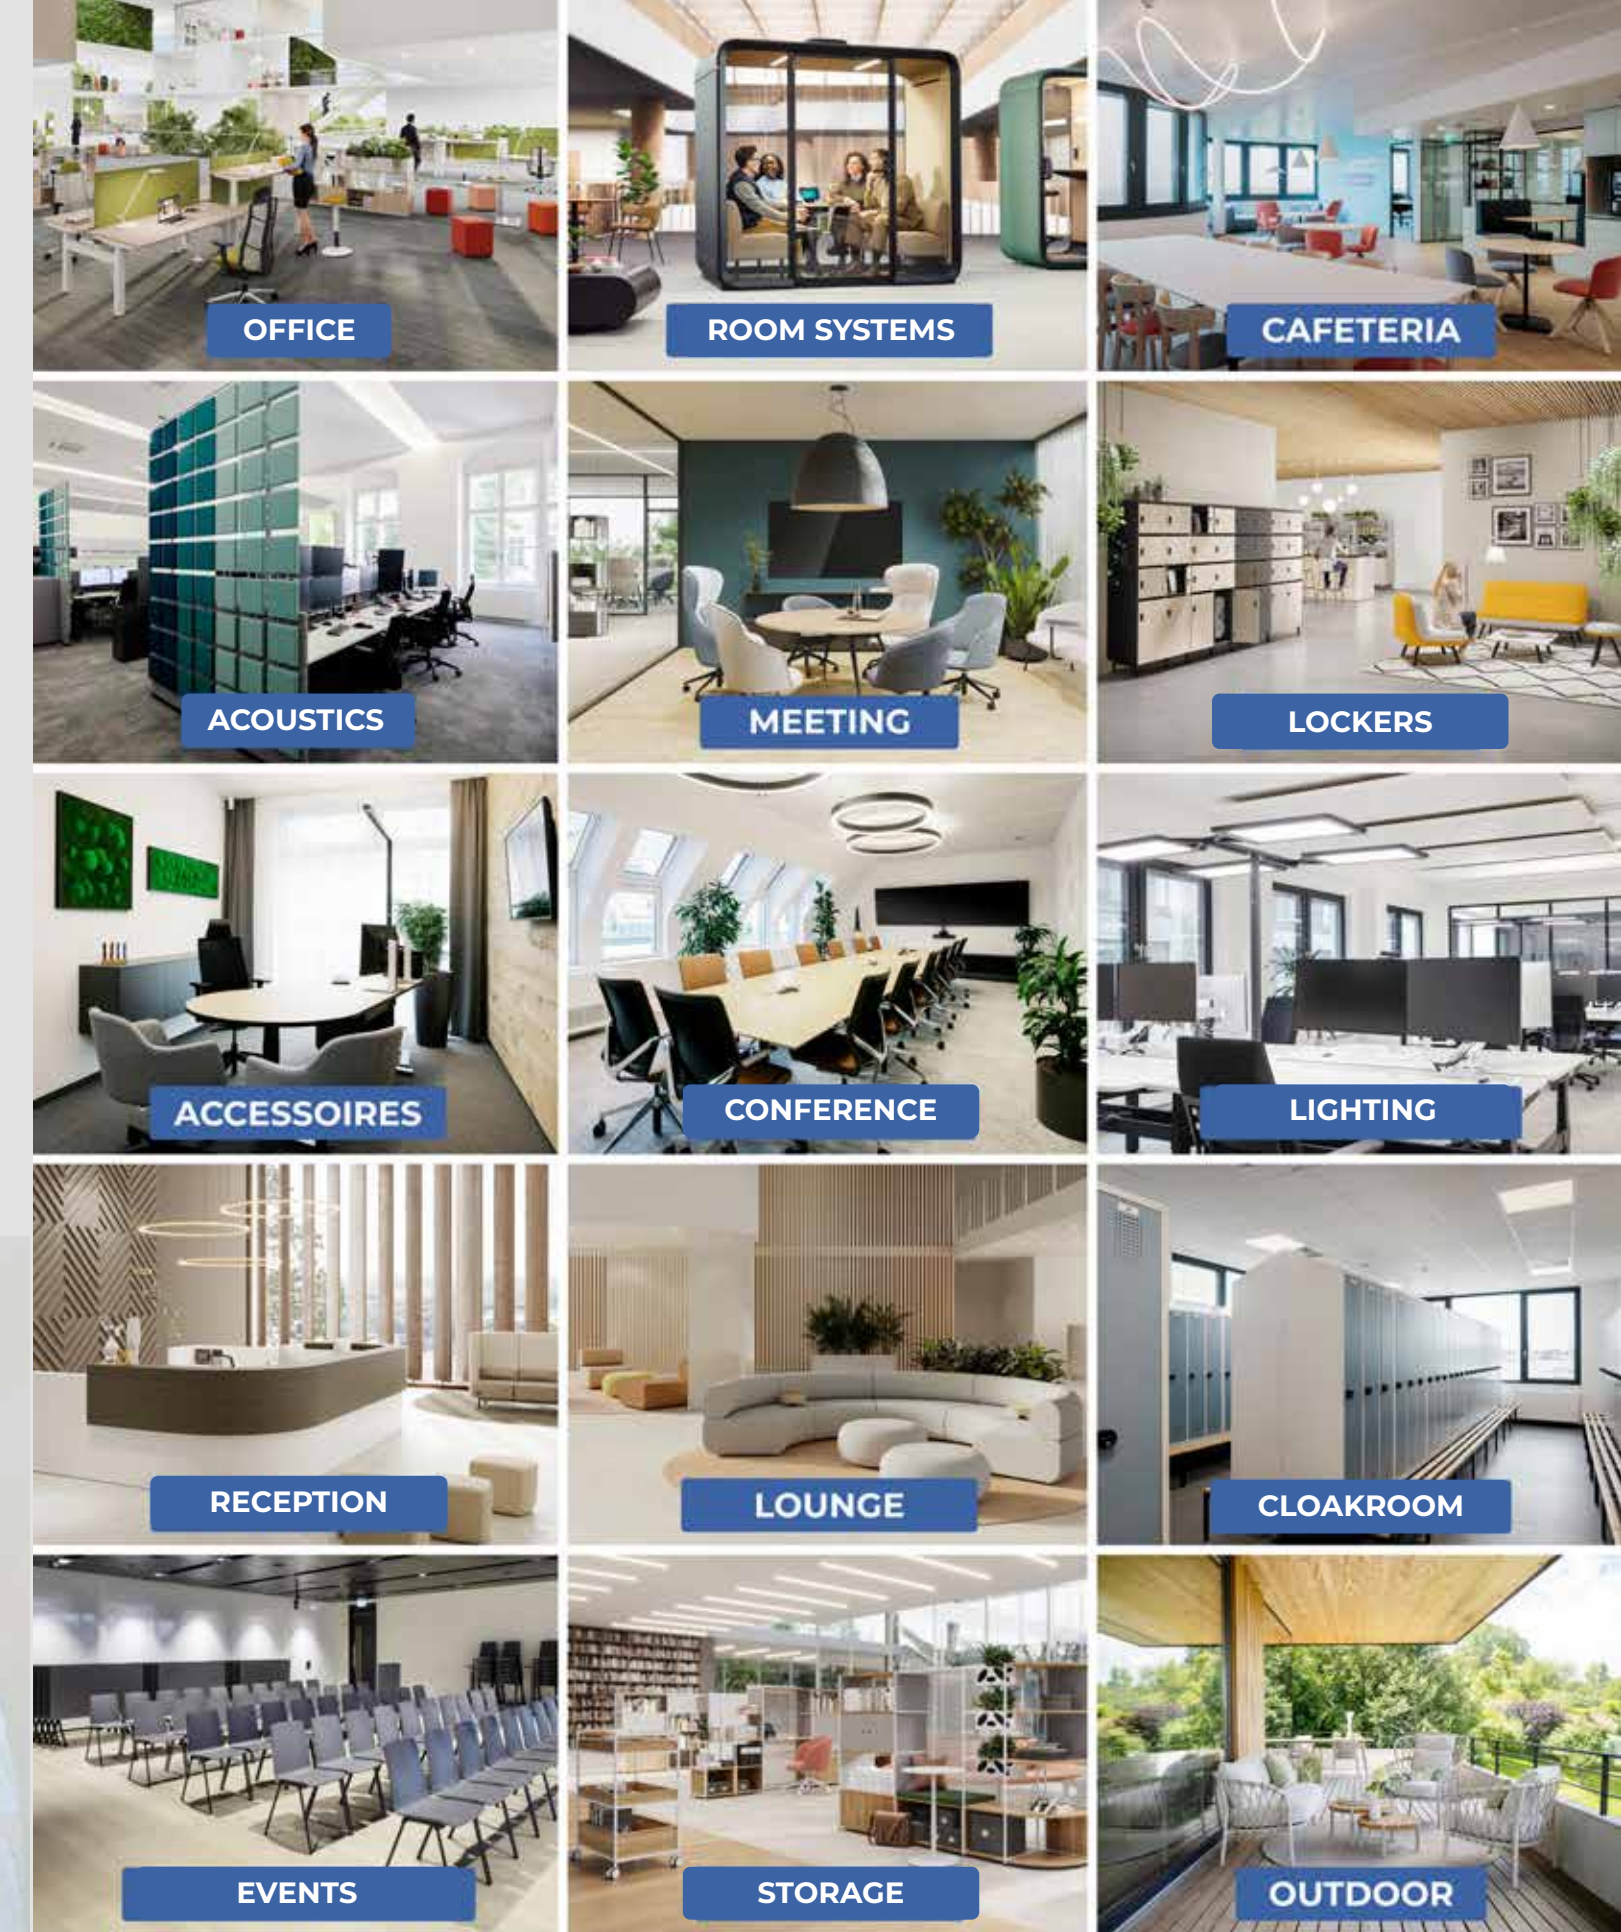

“The importance of holistic ergonomics in the workplace is a decisive competitive factor for companies. Systematic ergonomics goes beyond merely adapting furniture to the human body and also takes environmental and psychosocial aspects as well as the active behavior of employees into account.”

Dr.ⁱⁿ Gabriele Karbus
Occupational Physician

“Ergonomic work at computer workstations has many faces. A perfect mix of sitting, standing and compensatory exercises, supplemented by optimal, individually adjustable lighting, acoustic panels and glare protection, is essential for maintaining physical and mental well-being and for preventing work-related illnesses.”

Ing. Christian Jakits
Head of Facility Management, TUI Austria Holding GmbH

“Fally Büromöbel is the main supplier for our headquarters and more than 60 branches. In addition to their high level of expertise, we particularly appreciate the cooperative collaboration, the short response times, the creative planning potential and above all the sense for design, quality and functionality.”

Acoustic wall panels
For a natural and pleasant sound in the room

Feel-good accents "Moss pictures"
Reduce stress and increase well-being through "living" accents

Acoustic lights
Bright, pleasant atmosphere and optimal sound absorption

Soundproof office cabins
For undisturbed meetings and focused work

Biodynamic lighting
Enhances performance and concentration and strengthens the human biorhythm

Acoustic partition walls
Significant reduction of noise levels in the room

Acoustic ceiling sail
Ensures optimum acoustic well-being

Acoustic curtain
Glare-free and reflection-free work and reading

Acoustic wall panels
Create a pleasant working environment

Acoustic solutions for walls
Creating a pleasant working environment

Acoustic desk panel
A pleasant conversation atmosphere and better speech intelligibility

Ergonomic office chair
Reduces strain through precise adjustment to the body

Standing aid
Constant movement promotes a healthy posture

Document holder
Promotes a healthier posture and relieves neck muscles and eyes

Monitor arm
Promotes ergonomic posture and prevents neck and back pain

Height-adjustable desk
A mix of standing and sitting relieves the musculoskeletal system and intervertebral discs

Acoustic partition walls
Shielding and quiet for greater productivity

Breathable backrest
Provides more comfort for the back

Ergonomic stool
Moves in all directions, strengthens the back and relieves the spine

Anti-fatigue mats
Stimulate circulation and improve posture

 **We create work environments!**
Ergonomically designed. Individually planned.
